

Mount local folder as drive C in DOSBox

Running DOSBox in Linux you can mount a local folder as drive C: as follows:

Open a Terminal.

```
cd .dosbox  
  
vi dosbox-0.###.conf
```

(Use whatever editor you want.)

Add the following line in the [autoexec] section:

```
mount c ~/local_path
```

You can also add additional drives, if you want. Just specify another unique drive letter and local path on a new line.
